

COO of Platinum Health

Why I vaccinated for COVID-19

Modern medical practice has proven that vaccines work and I have no doubt they saved the lives of so many of my close family those many years ago. Vaccines have saved more people against TB, Polio, measles and many others, and they still do today.

Dr. Matome Sekgala
Chief Operations Officer

COVID-19 is not playing games with us, it never gave us a chance to prepare, and it is here to win against all of us. We have a chance to turn the wheel around by vaccinating.

I took the jab for COVID-19 because I don't want to live in fear, I would love to have my freedom back and to live life fully. I visit our clinics regularly and will not like to do that in fear. I would love to go home every day knowing that I have done everything possible to protect my family from this disease – by vaccinating.

We need to win the war against COVID-19, I need to win the war for my family, for my friends and colleagues that I engage with daily.

Above everything else we need to win our lives back. I am proud of myself that I took the jab for COVID-19.
