Platinum Health
Operations Managers
WHY WE CHOSE TO VACCINATE:

PLATINUM HEALTH

Dr, Markus Fourie – Operations Manager

I have decided to be vaccinated against COVID-19, because:

- It is the right thing to do.
- I want to protect the people that I love.
- I want to visit my children in Namibia freely.
- I want to hug my friends.
- I want to socialize without the fear of getting sick.
- Science proofed that we can beat any disease (smallpox, polio, etc.) by getting vaccinated.
- The vaccine dramatically lowers my risk to get very sick or to die.
- I want to see smiles on faces again.
- I want to pray together and worship.
- I want to be free from fear.
- I want to survive the pandemic.
PLEASE GET VACCINATED. PROTECT YOURSELF. PROTECT YOUR LOVED ONES!

Mr. Albert Kokota – Operations Manager

Being admitted in ICU is a terrifying and stressful experience
Earlier this year, I was admitted in ICU. For me it was a matter of life and death. For my family it was a stressful period. Immediately after being discharged from hospital, I vaccinated because I didn't want to land in hospital again. Vaccination reduces the risk of severe COVID-19 infection, hospitalization or even death.

Love your neighbour as you love yourself
I vaccinated because I care and love people around me. Getting vaccinated will protect people around me, particularly people at risk for severe illness from COVID-19.

Resuming activities – "returning to normal"
I vaccinated with an understanding that vaccination is the key to resuming activities that we did before the pandemic (going to Church, stadium, cinema/theatre, touring etc.). We want our lives to return to normal.

Dr Mel Mentz – Operations Manager

Being a Healthcare worker, I am in daily contact with people and at risk of contracting COVID-19.

It is medically proven that COVID-19 vaccination reduces the likelihood of developing serious illness or complications, should you contract COVID-19.

I love life …remember we only die once. We live every day!

Stay alive …get vaccinated.
