Dr Gwen Ramatlo**

**Why I chose to
vaccinate.....**

**PLATINUM
HEALTH**

I took the COVID 19 vaccine in order to I be at the frontline and assist our population in reaching the state of herd immunity. The added benefit of getting vaccinated is that it reduces my risk of contracting severe illness and complications as a result of COVID 19. I understood well that if herd immunity is attained there will be a significant reduction in the rate of new infections.

As a Healthcare Worker I have seen first-hand the severe disease and death as a result of COVID-19.

I have also experienced personal loss due to this pandemic.

If we all vaccinate, we can look forward to a future where we will be able to hug our family and friends again and spend time together.

I encourage all to take the jab to reclaim our normal interactions again.
