

# WARNING OVER COVID-19 SUPERSPREADER EVENTS

PLATINUM  
HEALTH

COVID-19 superspreader events play a huge role in how COVID-19 infections spread. Superspreader events are gatherings in which one infectious person, infects many others.

South Africa recently saw a cluster outbreak in the Western Cape, where 63 cases were linked to a club in the southern suburbs of Cape Town. Half of the infected are reportedly matric learners. (Source: SANews)

## EXAMPLES OF EVENTS WHERE SUPERSPREADING CAN TAKE PLACE:

- Taverns/Bars
- Restaurants
- Gyms
- Retail Stores
- Casinos
- Funerals
- Music festivals
- Weddings
- Choirs
- Parties

It is crucial that we all, regardless of our age, take personal responsibility in keeping ourselves and our loved ones safe.

## PROTECT YOURSELF:

- Always wear a mask when out in public.
- Avoid large gatherings.
- Keep a safe distance from others.
- Wash or sanitise hands regularly.
