Vaccination SUCCESS

Platinum Health (PH) is extremely proud to report that 97% of employees and contractors working at Siyanda Bakgatla Platinum Mine (SBPM) has been fully vaccinated against Covid-19, and 99% are partially vaccinated.

This industry leading achievement is the result of a collaborative effort between Platinum Health (PH) staff at Union Hospital, together with the support of SBPM. This is the first site where PH offers medical services to achieve such vaccination success!

All smiles from the Union Hospital team as they celebrated victory.

Powerful ways to BEAT BURNOUT

Burnout can get the better of you, even when you have great passion for your work. Burnout often results from a misalignment of input and output; you get burnt out when you feel like you're putting more into your work than you're getting out of it.

PROTECT YOURSELF! GET YOUR BOOSTER SHOT

Although the State of Disaster has been lifted, we should all remain vigilant and continue to protect ourselves against Covid-19.

With the cold winter months approaching, and a possible 5th Covid-19 wave expected in May 2022, it is all the more reason to protect ourselves by getting vaccinated and/or getting a booster dose.

If you are fully vaccinated, and especially if you have had your booster, you will be far better protected against serious illness, even death, should you become infected with Covid.

Your PREGNANCY JOURNEY

Platinum Health shares in the excitement of all our pregnant beneficiaries. We're here to support and guide you on your journey of motherhood.
